

ACT STUDIOS

WHY CHOOSE ACT STUDIOS:

At ACT Studios we are local builders, who choose to build out of premium recyclable materials. We have a specific focus on environmentally sustainable building practices, and to this end we have partnered with NETZERO, and we are proud to say that all our builds are fully carbon offset and NETZERO certified.

ACT Studios is Canberra's leader in back yard builds. We take care of the whole process from start to finish, including design & drafting, approvals, site works, plumbing, electrical, material supply, construction and project management, whether it's a home office, guest room or even a home gym. Renovations and extensions can be hugely disruptive and prohibitively expensive but building a detached studio can be achieved with less hassle and less dollars. We specialise in building studios, home offices, teenage retreats or just that extra bit of room. We do it all for a fixed price!

We believe that standard construction materials are outdated, we build our studios from structural insulated panels that are sandwiched between sleek BlueScope steel. This means a premium product that is hugely energy efficient, has high sound and thermal attenuation, and is installed in around 50% of the time (as compared to typically timber frame construction). The construction industry has a huge carbon footprint so at ACT Studios every one of our studios is 100% fully carbon offset.

Lastly, we are dialled in on the locally approvals legislation and can achieve most approvals as **DA exempt in as little as 4-6 weeks!**

STRUCTURAL MATERIALS:

Walls and Roof – Insul wall & Solar Span Insulated structural panels

High performance structural insulated panels, hugely energy efficient, great sound attenuation, sandwiched between Australian Bluescope Steel.

Exterior Finish

EXTERIOR FINISH

1 Render –Acrylic Render

2 Weatherboard (or similar hardie or weathertex cladding)

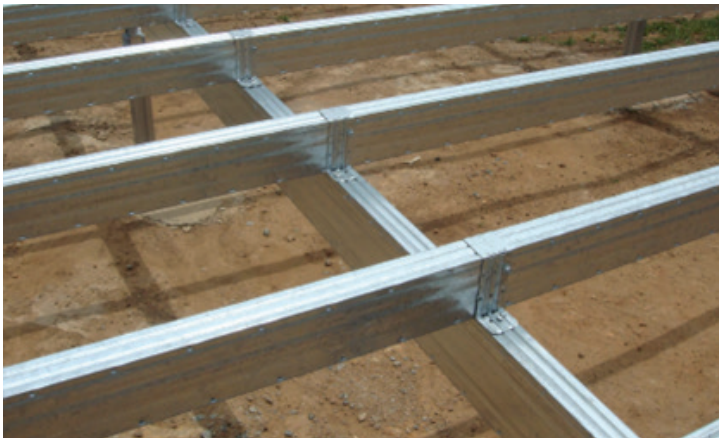

3 Colorbond cladding Customorb Cladding (horizontal or vertical)

FLOORING

Bluescope steel subfloor – lightweight, efficient, no termite worries, extremely useful on sloping sites.
